

Environmental Management Department (EMD)

STUDENT INTERN IMMEDIATE OPENINGS

JOB REQUIREMENTS

The **Environmental Compliance Division** of EMD is looking for students that are working towards a degree in a science major such as Environmental Studies/Science, Biology, Geology, Public Health, or a related field. Appointment to this class is restricted to students enrolled full-time in an accredited technical school, junior college, or four-year university. Incumbent curriculum must lead to a program certificate, Associate's, Bachelor's, or advanced degree.

Must be able to work **20-24 hours a week**.

JOB DESCRIPTION

Incumbent will work under close supervision in the **Hazardous Materials Business Plan (HMBP) Program** and occasionally with special projects.

Duties include, but are not limited to:

- Assisting in the collection and review of HMBP information submitted through the California Environmental Protection Agency's statewide database known as the **California Environmental Reporting System (CERS)**.
- Answering phone calls and emails to assist business owners/operators in completing their annual HMP submissions through CERS and with **return to compliance**.
- Reviewing and redacting confidential information from various Environmental Compliance documents for **public records requests**.

Student intern positions are temporary and may continue for up to three years after initial start date or up to one year after graduating.

PAY & BENEFITS

BENEFITS

3.1 hours of vacation for every 80 hours worked

3.75% matching Deferred Compensation

24 hours paid sick leave per calendar year
